## **BOOK SYNOPSIS**

Does urinating on Portuguese man-of-war stings do any good? Will coral grow inside coral cuts? Why do so many marine cuts in Hawaii become infected? All Stings Considered answers these and many other questions about the injuries that can occur while working or playing in Hawaii's ocean waters. Covering far more than stings, this book's topics range from barracuda bites to sunburn; from ciguatera fish poisoning to swimmers ear. This generously illustrated volume is the only medical guide that specifically addresses Hawaii's unique marine species. This book is for anyone who goes near or into the water ... or cares for those who do. It describes injury prevention and first aid in everyday language with descriptions and pictures for the layperson and more specialized information on each type of injury for the medical professional.
